DETAILED ACTION

Claim Rejections – 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by McEwan (6,191,724).

–Regarding to claim 11, McEwan discloses a method of radiating RF energy utilizing leads (158, 144) (see figure 6b) from a transistor (134) (see figure 6a) as the radiating elements or antennas, the method comprising:

procedure (134) of generating an RF signal with a transistor (134), the one or more RF transistors located on a substrate (166) (see figure 6b); and outputting the RF signal through one or more leads (158, 144), wherein the one or more leads are configured to connect the transistor to the substrate and the

leads are configured to radiate the RF energy to free space (see col. 11, lines 15-63).

Allowable Subject Matter

3. Claims 1-10 and 13-17 are allowed.
4. Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References (5,986,600), (6,426,716) and (6,586,999) are additionally cited because they are pertinent to the claimed method and associated system.
